Accounting for the benefits under Section 80JJAA of the Income Tax Act, 1961

The key qualifying criterion for availing the tax benefits under section 80JJAA are an increase in the number of employees during the year and eligible employees completing a period of employment of at least 240 days in the year either in the year of recruitment or in the immediately succeeding financial year.

During the quarter and in FY23, the number of employees in all businesses continued to increase. As a result, we continue to account for the tax benefits under Section 80JJAA of the Income Tax Act for the quarter and year in line with past practice.

We continue to receive, and account for, the tax benefits under section 80JJAA which have accrued to the Group during FY22. In FY23, the Group is also eligible to claim benefits in respect of those eligible employees employed in FY22 and completing a period of employment of at least 240 days in FY23.

On a standalone basis, the Company's current tax rate is close to NIL because of the benefits accruing under Section 80JJAA of the Income Tax Act, 1961.

The current tax rate reflects the amount of tax the Company is expected to pay when preparing and filing its tax returns. The real effective tax rate reflects the current tax plus the deferred tax effect on timing differences. The current tax rate and real effective tax rate, is computed below:
